Rep. Nunes Releases Statement on Senate Water Bill

Washington, D.C. – Congressman Devin Nunes (CA-22) today released the following statement on the introduction of a California water bill in the U.S. Senate:

“At long last, a water bill has been introduced in the Senate. Although I would have preferred a bill providing for stronger action and a long-term solution, this bill – once it passes the Senate – will finally provide a basis for the House and Senate to negotiate an action plan to bring Californians relief from this man-made water crisis.”
